---

## PROFILE

5th-semester BS Computer Science student at the National University of Pakistan, focused on ethical hacking, network security and digital forensics. Builds practical skills through consistent lab practice, OSINT exercises and self-directed security research, working toward bug bounty, red team and SOC analyst roles.

## EDUCATION

**BS Computer Science** — National University of Pakistan  
2024 – 2028 | Currently in 5th Semester | Rawalpindi, Pakistan

## CERTIFICATIONS

- Real Ethical Hacking in 46 Hours — CSEH + CEH PRO, Udemy
- Cyber Security Specialization — Innovista Learn Easy

## TECHNICAL SKILLS

|                    |                                                                                                             |
|--------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Security</b>    | Ethical Hacking, OSINT, Digital Forensics, Network Security, Web Security, Bug Hunting, Threat Intelligence |
| <b>Programming</b> | Python (Basic), JavaScript, C++, SQL, Bash, HTML, CSS                                                       |
| <b>Systems</b>     | Linux, Kali Linux, Windows, TCP/IP, DNS, HTTP/HTTPS, VPN, Firewalls                                         |
| <b>Tools</b>       | Burp Suite, Wireshark, Nmap, Metasploit, Gobuster, Dirsearch, Git, GitHub                                   |

## PROJECTS

**ThreatLens AI** — AI-assisted threat intelligence dashboard aggregating OSINT feeds to flag suspicious indicators.  
**Android Security Toolkit** — Scripts for Android APK static analysis — permissions, manifest, and string extraction.  
**Password Generator** — Client-side strong password generator with entropy scoring.  
**Port Scanner** — Python CLI TCP port scanner for authorized reconnaissance with banner grabbing.  
**Network Scanner** — Host discovery and service enumeration tool for lab subnets.  
**Bug Hunting Notes** — Public knowledge base documenting vulnerability classes and testing methodology.  
**Cyber Dashboard** — Self-hosted dashboard tracking learning progress and CTF statistics.

## CAREER OBJECTIVE

Aiming to build a career across bug bounty hunting, red team and blue team operations, SOC analysis, digital forensics, incident response, threat intelligence and ethical hacking.
